

The "x12" on the front means multiply by 12.

The population of the US is roughly 12 times that of Iraq.

So when the news reports that 2,000,000 Iraqis have fled their devastated country - imagine 24,000,000 Americans camped out in Canada or Mexico! In 2005, 122,000 boys and girls died there before the age of five. Here, that'd be 1,464,000 kids dead in a year, most from malnutrition, pneumonia, diarrhea.

How long will you let this horror drag on? Polls say 70% of the people of this country want the Iraq War over with. The 210th Congress was elected to end it. We are sick of excuses, rationalizations, subject changing. **We want action.**

You will be hearing from me again.

On the **Third Friday of every month**, Iraq Moratorium Day,

I will be taking some action to end this catastrophe.

It's high time Congress takes action, too.
